CONSULTING
SERVICES*

HIPAA violations are serious legal issues. And HIPAA complaints are serious matters, whether they are directed against you, or whether your rights have been violated. PCS-Medical Solutions is here to help. We are not Attorneys and we cannot provide legal advice. We are experts in the field of HIPAA and all of its implications.

PCS-Medical Solutions is distinguished by its unique HIPAA philosophy: we teach people to respect, but not to fear HIPAA.

While many entities bemoan HIPAA as a burden on healthcare, PCS-Medical

Solutions teaches the positive, long-term benefits of HIPAA. These include faster payments, fewer errors and rejected claims, more secure patient records, lower administrative overhead, and reduced patient litigation. We teach a positive approach to HIPAA that helps your workforce understand HIPAA better and protect patient data more effectively.

While becoming compliant with the HIPAA standards surrounding medicine today, it is important to keep in mind the higher reimbursement potential available for the compliant care delivered in your practice.
